

# Keysight Technologies

## M9380A PXIe CW Source

1 MHz to 3 GHz or 6 GHz

Data Sheet

# Overview

## Introduction

With high-power levels and accurate measurements, the M9380A CW source provides the Keysight Technologies, Inc. quality and performance in the PXI form factor—a trusted Keysight product with global services and support, fast repair and a wide scope of calibration utilities.

## Product description

The M9380A PXIe CW source is a compact modular solution that provides frequency coverage from 1 MHz to 3 or 6 GHz. A typical M9380A configuration includes three individual PXIe modules—M9310A source output, M9301A synthesizer and the M9300A frequency reference—designed for fast data interfaces and high-speed automated test systems. Instrument control is provided through a soft front panel and programmatic interfaces tuned to your application development environment of choice.

## Product features

- Frequency coverage from 1 MHz to 3 or 6 GHz
- Output power of +18 dBm across the frequency range
- Output power level of +19 dBm from 1 MHz to 5 GHz
- Better than  $\pm 0.4$  dB absolute amplitude accuracy
- License key upgraded frequency range and output power
- One day startup assistance
- Return to Keysight warranty—3 years
- Chassis slot compatibility: PXIe slot

## Uncompromising values

- Keeps costs manageable—purchase what you need today and easily upgrade later using license-key upgrades without returning your modules to Keysight.
- Reduces development time and simplifies integration into existing test environments with multiple drivers and programmatic interfaces.
- Reduces startup time with Keysight IO libraries easy configuration, one-step software install, and integrated instrument level CW source soft front panel.
- Fast repair turnaround time with calibrated core exchange strategy.

## Applications

- Aerospace and defense
- Interference injection
- LO substitution
- Wireless component test

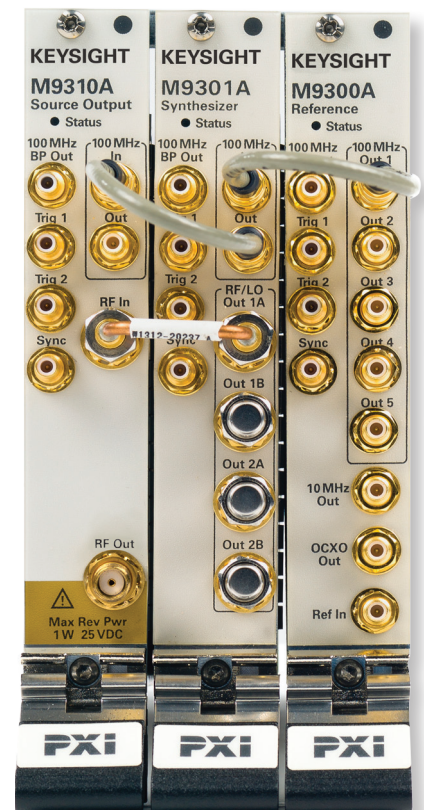

Figure 1. M9380A PXIe CW source with three modules consisting of the M9310A PXIe source output, M9301A PXIe synthesizer, and M9300A PXIe frequency reference.

## Technical Specifications and Characteristics

### Block diagram

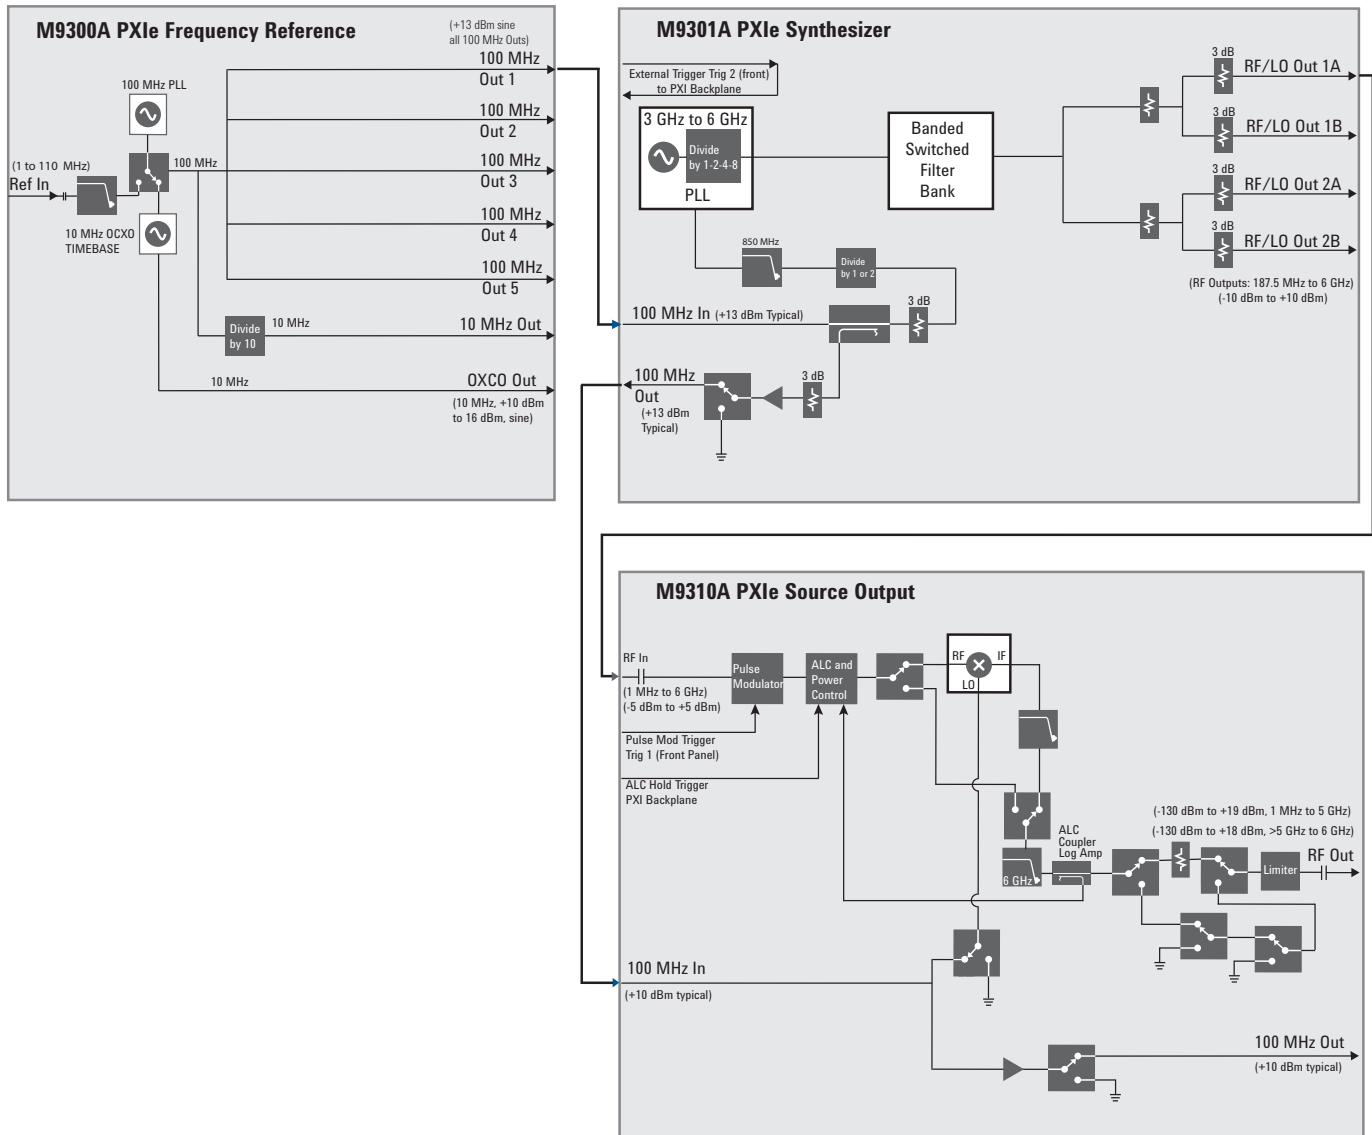

Figure 2. M9380A PXIe CW source with three modules consisting of the M9300A PXIe frequency reference, M9301A PXIe synthesizer and M9310A PXIe source output.

## Technical Specifications and Characteristics

### Definitions for specifications

Temperatures referred to in this document are defined as follows:

- Full temperature range = Individual module temperature of  $\leq 75$  °C, as reported by the module, and environment temperature of 0 to 55 °C.
- Controlled temperature range = Individual module temperature of  $\leq 55$  °C, as reported by the module, and environment temperature of 20 to 30 °C.

Specifications describe the warranted performance of calibrated instruments. Data represented in this document are specifications unless otherwise noted under the following conditions.

- Calibrated instruments have been stored for a minimum of 2 hours within the full temperature range
- 45 minute warm-up time
- Calibration cycle maintained
- When used with Keysight M9300A frequency reference
- When used with Keysight interconnection cables

Characteristics describe product performance that is useful in the application of the product, but that is not covered by the product warranty. Characteristics are often referred to as Typical or Nominal values and are italicized.

- Typical describes characteristic performance, which 80% of instruments will meet when operated within the controlled temperature range.
- Nominal describes representative performance that is useful in the application of the product when operated within the controlled temperature range.

### Recommended best practices in use

- Use slot blockers and EMC filler panels in empty module slots to ensure proper operating temperatures.
- Keysight chassis and slot blockers optimize module temperature performance and reliability of test.
- At environment temperatures above 45 °C, chassis fan should be set to high.

### Additional information

- All graphs contain measured data from one unit and is representative of product performance at the controlled temperature range unless otherwise noted.
- The specifications contained in this document are subject to change.

## Technical Specifications and Characteristics (continued)

### Frequency

| Frequency range  |                       |                 |
|--|-----------------------|-----------------|
| Option F03   | 1 MHz to 3 GHz        |                 |
| Option F06   | 1 MHz to 6 GHz        |                 |
| Resolution   | 0.01 Hz               |                 |
| Frequency switching speed <sup>1</sup>                       |                       |                 |
|  | $\leq 5$ ms, nominal  |                 |
| Frequency reference (M9300A PXIe frequency reference module) |                       |                 |
| Reference outputs  |                       |                 |
| 100 MHz Out (Out 1 through Out 5)                            |                       |                 |
| Amplitude  | $\geq 10$ dBm         | 13 dBm, typical |
| Connectors   | 5 SMB snap-on         |                 |
| Impedance  | 50 $\Omega$ , nominal |                 |
| 10 MHz Out   |                       |                 |
| Amplitude  | 9.5 dBm, nominal      |                 |
| Connectors   | 1 SMB snap-on         |                 |
| Impedance  | 50 $\Omega$ , nominal |                 |
| OCXO Out   |                       |                 |
| Amplitude  | 11.5 dBm, nominal     |                 |
| Connectors   | 1 SMB snap-on         |                 |
| Impedance  | 50 $\Omega$ , nominal |                 |

1. Mean time from IVI command to carrier frequency settled within 1 ppm or 1 kHz whichever is greater and amplitude settled within 0.2 dB (at the controlled temperature range) or within 0.5 dB (at the full temperature range). If the ALC is off, the settle limit is 0.5 dB above +10 dBm, (at the controlled temperature range). Simultaneous carrier frequency and amplitude switching.

### Frequency (continued)

#### Frequency accuracy

Same as accuracy of internal time base or external reference input

#### Internal timebase

|          |  |
|----------|--|
| Accuracy | ± (time since last adjustment x aging rate)<br>± temperature effects<br>± calibration accuracy |
|----------|--|

#### Frequency stability

##### Aging rate

|   |  |
|---|--|
| Daily   | < ±0.5 ppb/day, after 72 hour warm-up    |
| Yearly  | < ±0.1 ppm/year, after 72 hours warm-up  |
| Total 10 years  | < ±0.6 ppm/10yrs, after 72 hours warm-up |
| Achievable initial calibration accuracy (at time of shipment) | ±5 x 10 <sup>-8</sup>                    |

#### Temperature effects

|                        |           |
|------------------------|-----------|
| 20 to 30 °C            | < ±10 ppb |
| Full temperature range | < ±50 ppb |

#### Warm up

|   |             |
|---|-------------|
| 5 minutes over +20 to +30 °C, with respect to 1 hour  | < ±0.1 ppm  |
| 15 minutes over +20 to +30 °C, with respect to 1 hour | < ±0.01 ppm |

#### External reference input

|            |                             |
|------------|-----------------------------|
| Frequency  | 1 MHz to 110 MHz, sine wave |
| Lock range | ±1 ppm, nominal             |
| Amplitude  | 0 to 10 dBm, nominal        |
| Connector  | 1 SMB snap-on               |
| Impedance  | 50 Ω, nominal               |

## Technical Specifications and Characteristics (continued)

|---------------------------------------|------------------|
| Pulse on/off ratio 1 MHz to 400 MHz   | > 85 dB, typical |
| Pulse on/off ratio > 400 MHz to 6 GHz | > 95 dB, typical |
| Pulse rise/fall time                  | < 10 ns, nominal |

### System requirements

| <b>Topic</b>                      | <b>Windows 7 requirements</b>   |
|-----------------------------------|---|
| Operating systems                 | Windows 7 (32-bit and 64-bit)   |
| Processor speed                   | 1 GHz 32-bit (x86), 1 GHz 64-bit (x64)<br>(no support for Itanium 64)   |
| Available memory                  | 4 GB minimum<br>8 GB or greater recommended   |
| Available disk space <sup>3</sup> | 1.5 GB available hard disk space, includes:<br>- 1 GB available for Microsoft .NET framework 3.5 SP1 <sup>4</sup><br>- 100 MB for Keysight IO libraries suite |
| Video                             | Support for DirectX 9 graphics with 128 MB graphics memory recommended<br>(Super VGA graphics is supported)   |
| Browser                           | Microsoft Internet Explorer 7.0 or greater  |
| Keysight IO libraries             | Version 16.3.16603.3 or later   |

1. Non-harmonics include mixing spurs for frequencies below 400 MHz, synthesizer spurs, and other miscellaneous chassis and power supply products, for offsets >10 kHz.
2. With a Keysight M9036A embedded controller.
3. Because of the installation procedure, less memory may be required for operation than is required for installation.
4. NET framework runtime components are installed by default with Windows Windows 7. Therefore, you may not need this amount of available disk space.

1. Samples of this product have been type tested in accordance with the Keysight environmental test manual and verified to be robust against the environmental stresses of storage, transportation and end-use--those stresses include but are not limited to temperature, humidity, shock, vibration, altitude and power-line conditions. Test methods are aligned with IEC 60068-2 and levels are similar to MIL-PRF-28800F Class 3.

## Software

| Instrument connection software   |   |   |  |
|--|---|---|--|
|   | Keysight IO library   | The IO suite offers a single entry point for connection to the most common instruments including AXIe, PXI, GPIB, USB, Ethernet/LAN, RS-232, and VXI test instruments from Keysight and other vendors. It automatically discovers interfaces, chassis, and instruments. The graphical user interface allows you to search for, verify and update IVI instrument and soft front panel drivers for modular and traditional instruments. The IO suite safely installs in side-by-side mode with NI I/O software. | Free software download at <a href="http://www.keysight.com/find/iosuite">www.keysight.com/find/iosuite</a>                         |
| Module setup and usage   |   |   |  |
|   | Keysight soft front panel   | The PXI module includes a soft front panel (SFP), a software-based graphical user interface (GUI) which enables the instrument's capabilities from your PC.   | Included on CD-ROM shipped with module or online   |
| Programming  |   |   |  |
| Driver   | Development environments  |   |  |
| IVI-COM<br>IVI-C<br>LabVIEW<br>MATLAB  | Visual Studio (VB.NET, C#, C/C++), VEE<br>LabVIEW, LabWindows/CVI, MATLAB   |   | Included on CD-ROM shipped with module or online   |
| Programming assistance   |   |   |  |
|  | Command expert  | Assists in finding the right instrument commands and setting correct parameters. A simple interface includes documentation, examples, syntax checking, command execution and debug tools to build sequences for integration in Excel, MATLAB, Visual Studio, LabVIEW, VEE, SystemVue.   | Free software download at <a href="http://www.keysight.com/find/commandexpert">www.keysight.com/find/commandexpert</a>             |
| Programming examples   | Each module includes programming examples for Visual Studio.net, LabVIEW, MATLAB, LabWindows, and Keysight VEE Pro. |   | Included on CD-ROM shipped with module or online at <a href="http://www.keysight.com/find/m9380a">www.keysight.com/find/m9380a</a> |

## Setup and Calibration Services

| <b>Assistance</b>                          |  |   |
|--|--|---|
| One day startup assistance                 | Gain access to a technical expert who will help you get started quickly with the M9380A CW source and its powerful software tools. The flexible instruction format is designed to get you to your first measurements and familiarize you with ways to adapt the equipment to a specific application.   | Included in base configuration  |
| <b>Calibration and traceability</b>        |  |   |
| Factory calibration                        | The M9380A CW source ships factory calibrated with an ISO-9002, NIST-traceable calibration certificate.  | Included in base configuration  |
| Calibration cycle                          | A one year calibration cycle is recommended.   |   |
| Calibration sites                          | <ul style="list-style-type: none"> <li>- At Keysight worldwide service centers</li> <li>- On-site by Keysight</li> <li>- By self-maintainers</li> </ul>  | More information visit <a href="http://www.keysight.com/find/infoline">www.keysight.com/find/infoline</a>   |
| N7800A Calibration and adjustment software | The M9380A CW source is supported by Keysight's Calibration and adjustment software. This is the same software used at Keysight service centers to automate calibration. The software offers compliance tests for ISO 17025:2005, ANSI/NCSL Z540.3-2006, and measurement uncertainty per ISO Guide to Expression of Measurement Uncertainty. | Licensed software. For more information, visit <a href="http://www.keysight.com/find/calibrationsoftware">www.keysight.com/find/calibrationsoftware</a> |
| Keysight calibration status utility        | The Keysight calibration status utility helps ensure your M9380A is calibrated by managing the calibration interval and providing messages regarding instrument and module calibration status.   | Included in base configuration  |

## Support and Warranty

| <b>Warranty</b>                             |   |   |
|---|---|---|
| Global warranty                             | Keysight's warranty service provides standard coverage for the country where product is used. <ul style="list-style-type: none"> <li>– All parts and labor necessary to return to full specified performance</li> <li>– Recalibration for products supplied originally with a calibration certificate</li> <li>– Return shipment</li> </ul> | Included                                  |
| Standard                                    | Return to Keysight warranty—3 years<br>15 days typical turnaround repair service  | Included                                  |
| R-51B-001-5Z                                | Return to Keysight warranty—5 years<br>15 days typical turnaround repair service  | Optional                                  |
| R-51B-001-3X<br>Express warranty<br>3 years | The express warranty upgrades the global warranty to provide, for 3 years, a 5 day typical turnaround repair service in the US, Japan, China and many EU countries.   | Optional                                  |
| R-51B-001-5X<br>Express warranty<br>5 years | The express warranty upgrades the global warranty to provide, for 5 years, a 5 day typical turnaround repair service in the US, Japan, China and many EU countries.   | Optional                                  |
| <b>Support</b>                              |   |   |
| Core exchange program                       | Keysight's replacement core exchange program allows fast and easy module repairs. A replacement core assembly is a fully functioning pre-calibrated module replacement that is updated with the defective module serial number, allowing the replacement module to retain the original serial number.                                       | For qualified self-maintainers in US only |
| Self-test utility                           | A self-test utility runs a set of internal tests which verifies the health of the modules and reports their status.   | Included in base configuration            |

## Configuration and Ordering Information
